

MANISH DIVEKAR

DATA ANALYST

manishdivekar.analyst@gmail.com | [+91-8010103486](tel:+91-8010103486) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

CAREER SUMMARY:

Data Analyst with hands-on experience in **Python**, **SQL**, and **Power BI**, skilled in analyzing datasets and generating actionable insights for business decision-making.
Proven ability to translate complex datasets into clear, **interactive visualizations** for cross-functional teams

SKILLS:

Python | SQL | MySQL | Power BI | Tableau | Excel | Pandas | NumPy | Matplotlib | Seaborn | EDA | Data Cleaning | ETL | Data-Modeling | Statistical Analysis | KPIs | Predictive Analytics | Power Query | DAX | Data Interpretation | Analytical Reporting | Decision Making | Business Communication.

EXPERIENCE

Data Analyst Intern, InLighnX Global Pvt. Ltd. | Jul 2025 – Aug 2025

- Analyzed sales data using Python to identify high-value customer segments and revenue drivers.
- Cleaned and processed datasets (~10K+ records) to uncover trends and improve data quality.
- Developed interactive Power BI dashboards tracking sales, profit, and category performance.
- Performed SQL analysis to identify customer behavior patterns and key revenue insights.

PROJECTS

E-commerce Sales Dashboard (Power BI) | Internship Project

Aug 2025

- Designed an interactive dashboard to visualize sales, profit, quantity sold, payment modes, and category-wise performance for an e-commerce dataset.
- Built KPI cards, state-wise sales map, category pie chart, trend analysis, slicers, tooltips, and conditional formatting for business insights.
- Helped stakeholders quickly identify sales trends, regional performance, and category contributions for data-driven decision making.

Amazon Global Sales Analysis | Python, MySQL, Power BI, EDA

Jun 2025

- Built an end-to-end sales analytics pipeline to ingest Excel data into MySQL.
- Performed EDA to identify trends in sales and delivery performance.
- Analyzed KPIs including profit, delivery time, and customer segments.
- Built interactive dashboards to monitor business performance.

AI-Powered Collections Strategy (Tata iQ Simulation) | GenAI, Predictive Analytics

Apr 2026

- Conducted EDA on **500 customer records** to identify key delinquency risk factors.
- Identified high-risk segments using indicators like **>50% credit utilization, 2+ missed payments, and DTI >0.5**.
- Designed predictive framework to prioritize at-risk customers for early intervention.
- Developed AI-driven collections strategy with automated outreach targeting high-risk segments.
- Proposed targeted actions **aiming to reduce delinquency by 10–15%** in pilot segment.
- Ensured **responsible AI** usage with focus on **fairness, transparency, and compliance**.

Customer Churn Analysis | Power BI, DAX, Python, SQL

Mar 2025

- Analyzed **7,043 customer** records and **23 features** to identify churn patterns and key drivers.
- Found that month-to-month contracts and early-tenure customers were more likely to churn.
- Built dashboards to track churn trends and support retention strategies.

CERTIFICATION:

- | | |
|--|---------------------|
| Master's of Data Analytics Program – The iScale | –Issued 3 May 2025 |
| SQL Intermediate Certification – Hackerrank | –Issued 13 Apr 2025 |
| GenAI Powered Data Analytics Job Simulation, Tata (Forage) | –Issued 22 Apr 2026 |

EDUCATION:

BSc in Agriculture – Shri Sai Janvikas Pratishthan | Khandala, ch sambhajinagar.

Jul 2016 – Aug 2020

EMPLOYMENT GAP

Dedicated to full-time competitive exam preparation (**Nov 2020 – Dec 2024**), strengthening analytical and problem-solving skills.
