

Online Store Sales Analysis & Dashboard (Excel)

Overview

This project involves importing data files and creating a fully functional online store dashboard. The objective is to analyze annual sales reports by performing data cleaning, processing, analysis, and visualization using Advanced Excel to derive actionable business insights.

Problem Statement & Analysis

- 1 Top 5 Sales by State – Identify best-performing states
- 2 Orders by Age Group – Segment sales based on demographics
- 3 Annual Report by Order Status – Track completed, pending, and canceled orders
- 4 Sales & Orders Trend (Monthly) – Analyze trends over time
- 5 Highest Sales by Gender – Determine key contributing customer segment
- 6 Sales by Channel – Analyze performance across platforms (Amazon, Myntra, Flipkart)

Conclusion & Business Strategy

- 1 Target women customers aged 25–50
- 2 Focus on Maharashtra, Karnataka, and Uttar Pradesh
- 3 Run seasonal marketing campaigns during peak periods
- 4 Promote across Amazon, Myntra, and Flipkart for maximum reach

Analytical Tools Used

- 1 Advanced Excel – Data Cleaning, Pivot Tables, Charts, Dashboarding
